

REPORT FOR FCTU - THE RESHAPING FS CONSULTATION

30th January 2015

This paper is intended to clarify and put into context the FCTU response to the Forest Services consultation on "Reshaping the FS", which was presented to FS England staff by the England Forest Services Board on 3rd November 2014.

Taking into account the comments changes the overall picture considerably. The attached table shows each individual response number from the raw data supplied. These have been used again in the interests of completeness and transparency. Highlighted numbers indicate that the response has been adjusted to take into account comments as well as the answer to the "workable" question.

For the first questions within each major section of the consultation the adjusted scores are as follows:
